STAMA MAESTRO MTN

A new product has now been added to the range of STAMA electric vehicles.

STAMA Maestro is a vehicle with high driving comfort, thanks to a luxurious and quiet cabin, and an excellent suspension.

Among the many standard features are, for example, comfortable seats with 3-point seat belt, rear window, maintenance-free Lithium-ion batteries and carbon-free electric motor.

The vehicle is available with a wide variety of flatbeds or bodies, with and without tips.

With 1,000 kg load capacity and speed up to 70 km/h, STAMA Maestro is the obvious choice if you want a reliable, quiet and emission-free vehicle to help with the many tasks that exist around the maintenance of green areas, residential areas, institutions, city centers etc.

The maximum speed is programmable.

STAMA Maestro is type-approved in the EU and can therefore easily be registered for driving on public roads in all EU countries.

Transmission	Motor	Battery	Range	Max. speed
8.8:1	72V - 9 kW	LiFePO4 14,4 kW - 200 amp.h	87 km (WLTP)	70 km/h
12.5:1	72V - 9 kW	LiFePO4 14,4 kW - 200 amp.h	132 km (WLTP)	55 km/h

Transmission 8.8:1

Transmission 12.5:1
